Detailed Action

The 112, second paragraph rejections of claims 9-10 are withdrawn in light of applicant's remarks and amendment at paper no. 5/B.

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 8-11 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while providing enablement for R2 equaling 1 to 2 nitro, or amino groups on the phenyl ring in a meta position, does not reasonably provide enablement for R2 equaling 3 or more nitro or amino groups on a phenyl ring. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims. The claims as recited are broader than the scope of enablement. The specification lacks direction or guidance for placing all of the alleged products in the possession of the public without inviting more than routine experimentation. The applicant is referred to *In re Wands*, 858 F.2d 731, 737, 8 USPQ2d 1400, 1404 (Fed. Cir. 1988) which includes the incorporation of the 8 factors recited in Ex parte Foreman 230 USPQ 546 (Bd. Of App. And Inter 1986). No compound has ever been synthesized where a phenyl ring can support electron-withdrawing groups such as nitro in the ring in the ortho position.

Art Unit: 1625

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A. In claim 8, lines 3-4, page 12, the phrase "one or more C1-C6 alkyl, C1-C6 alkoxy, halo, nitro, amino or trifluoromethyl" is indefinite and ambiguous. There is no upper bound on the phrase "one or more". Additionally a phenyl ring cannot support electron-withdrawing groups such as nitro in the ortho position.

Response to Applicant's Remarks

112, first paragraph enablement rejection

The applicant asserts that processes are known in the art for producing phenyl compounds that are substituted at the ortho position with a nitro or amino groups. However, the examiner notes that it is not known in the art for a phenyl ring to possess 3 or more electron withdrawing groups such as nitro or amino groups on the ring. The applicant has not disclosed how to make such compounds in the specification.

2nd paragraph enablement rejection of claim 8

Regarding the phrase in claim 8, "one or more", the applicant alleges that it is not required that the application describe claim limitations in detail greater than the invention warrants. However, this phrase encompasses compounds that are not known in the art to exist, such as phenyl groups with 4 bulky electron withdrawing groups such as amino. This phrase even encompasses more groups than can fit on the phenyl ring.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
